

Population-scale characterization of structural variants in humans

Motivation and background

Prostate cancer

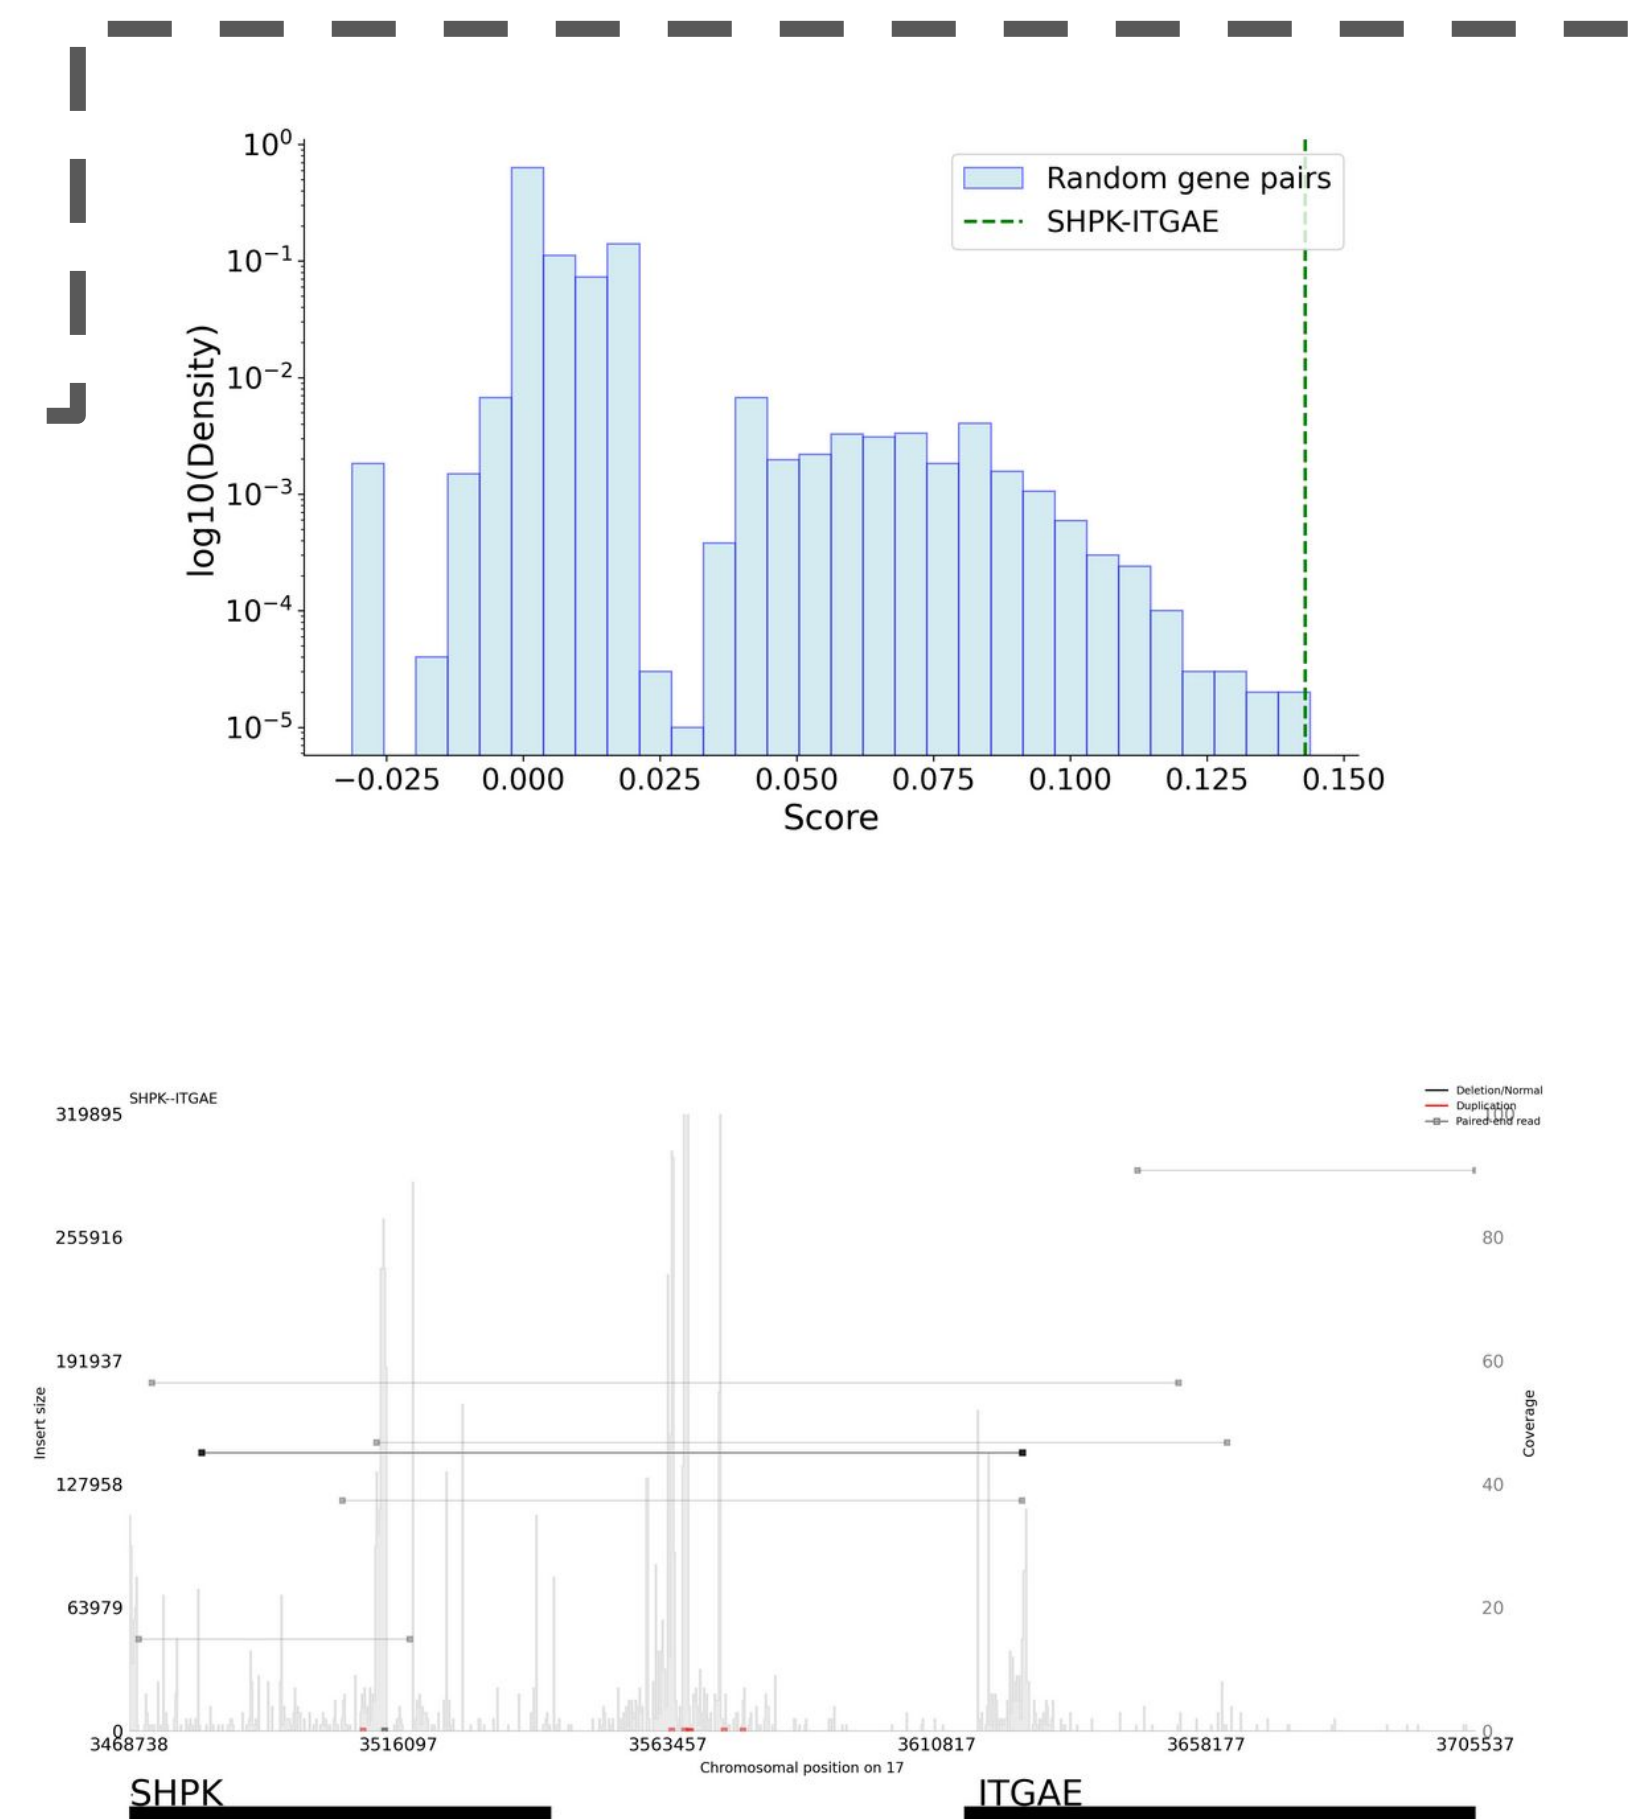

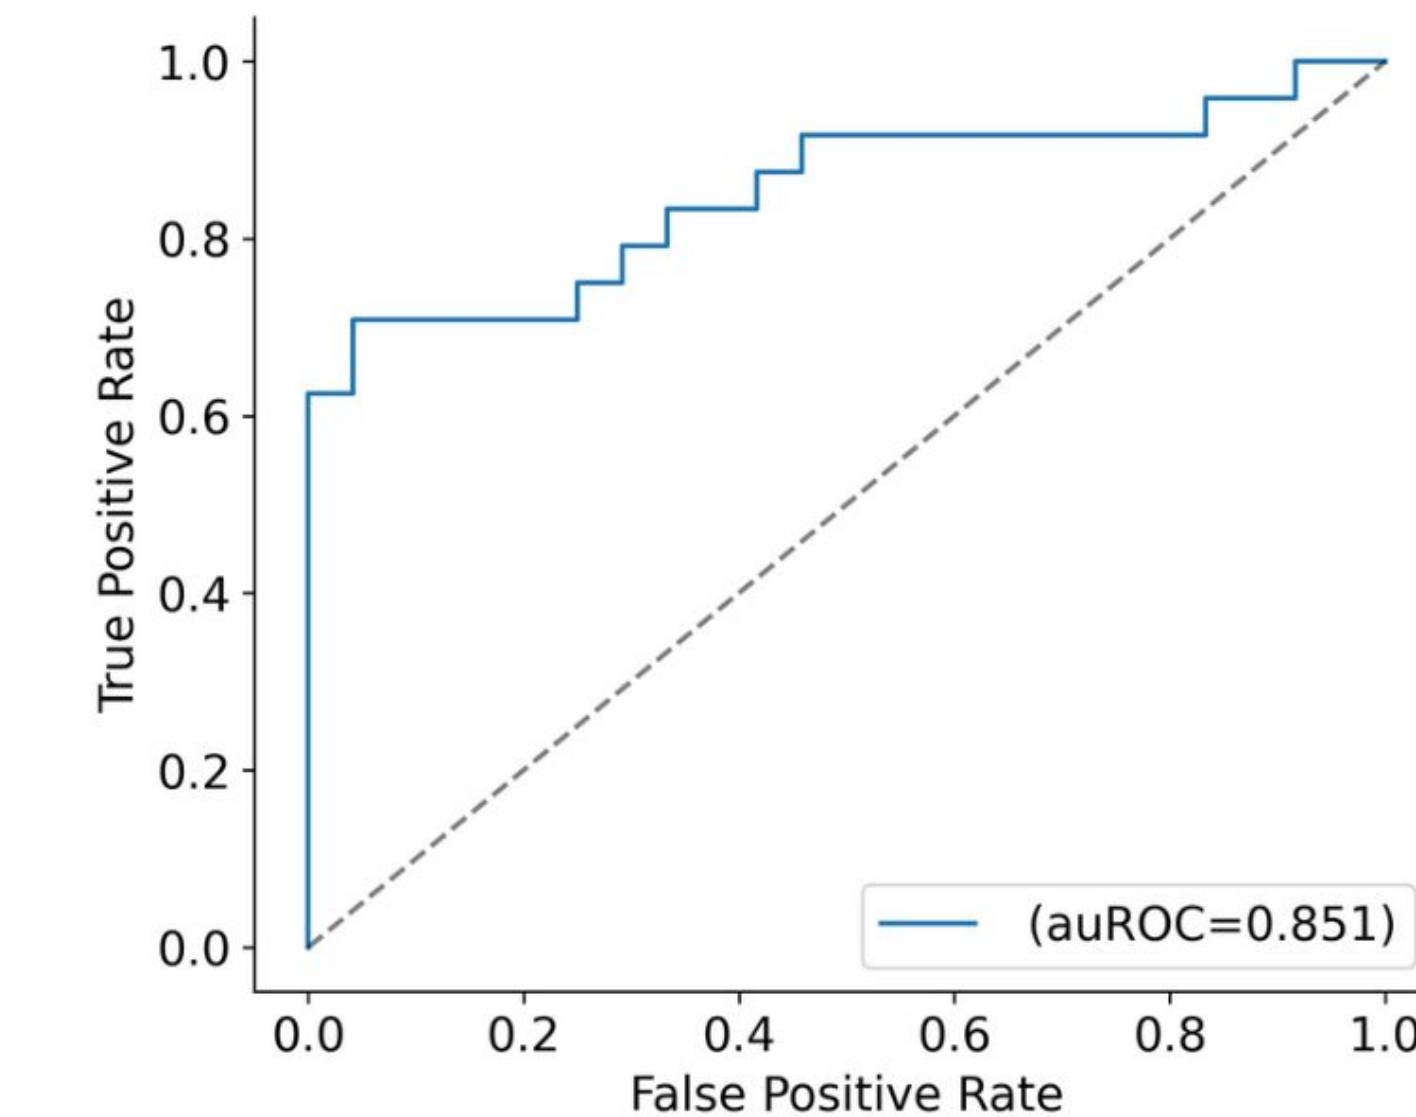

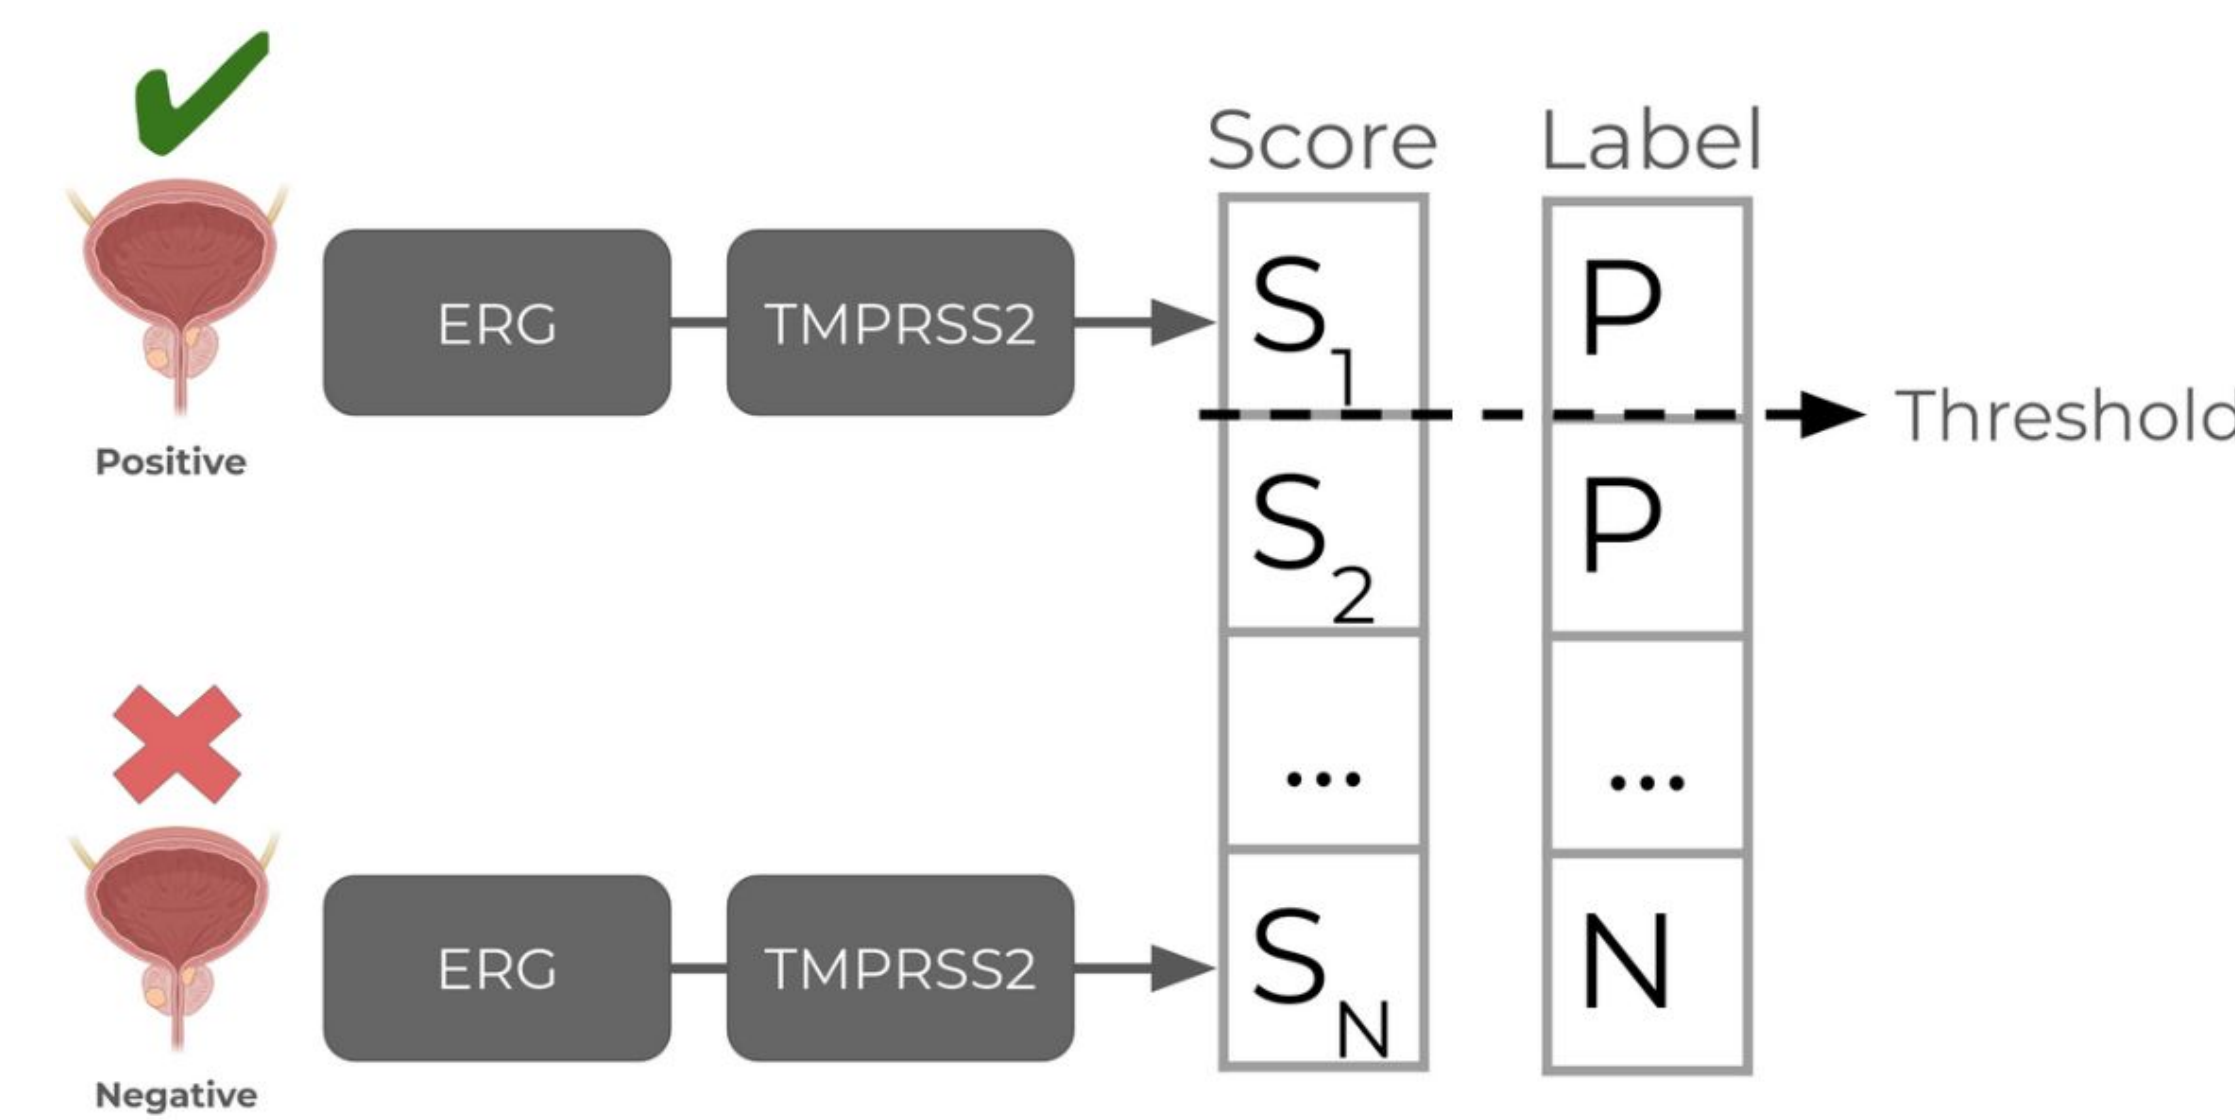

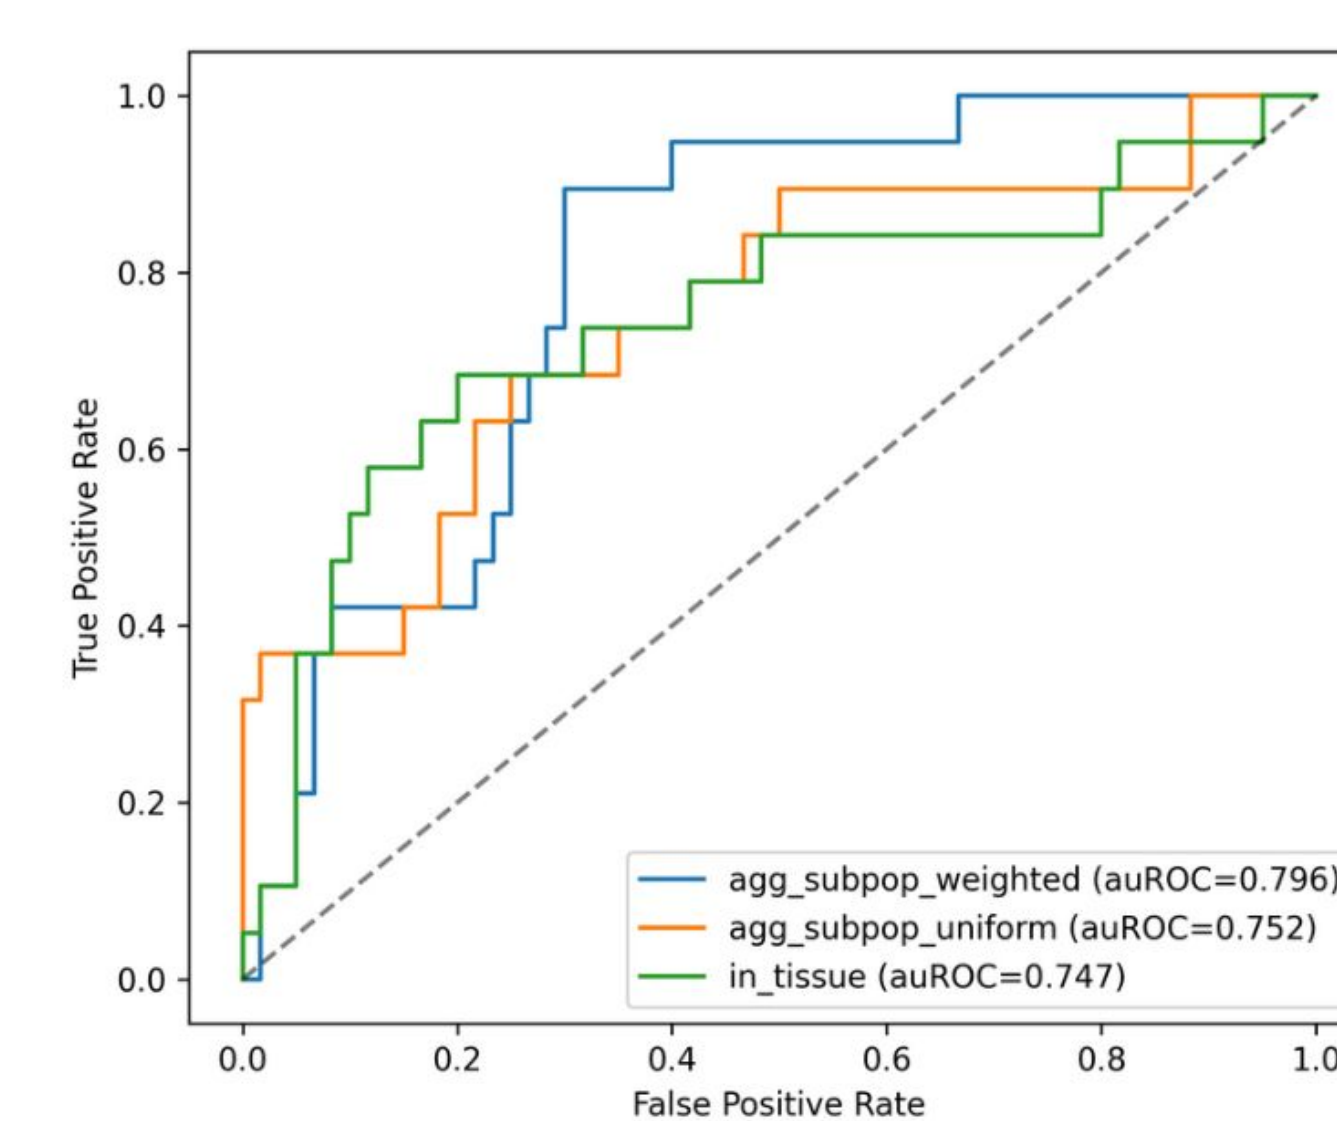

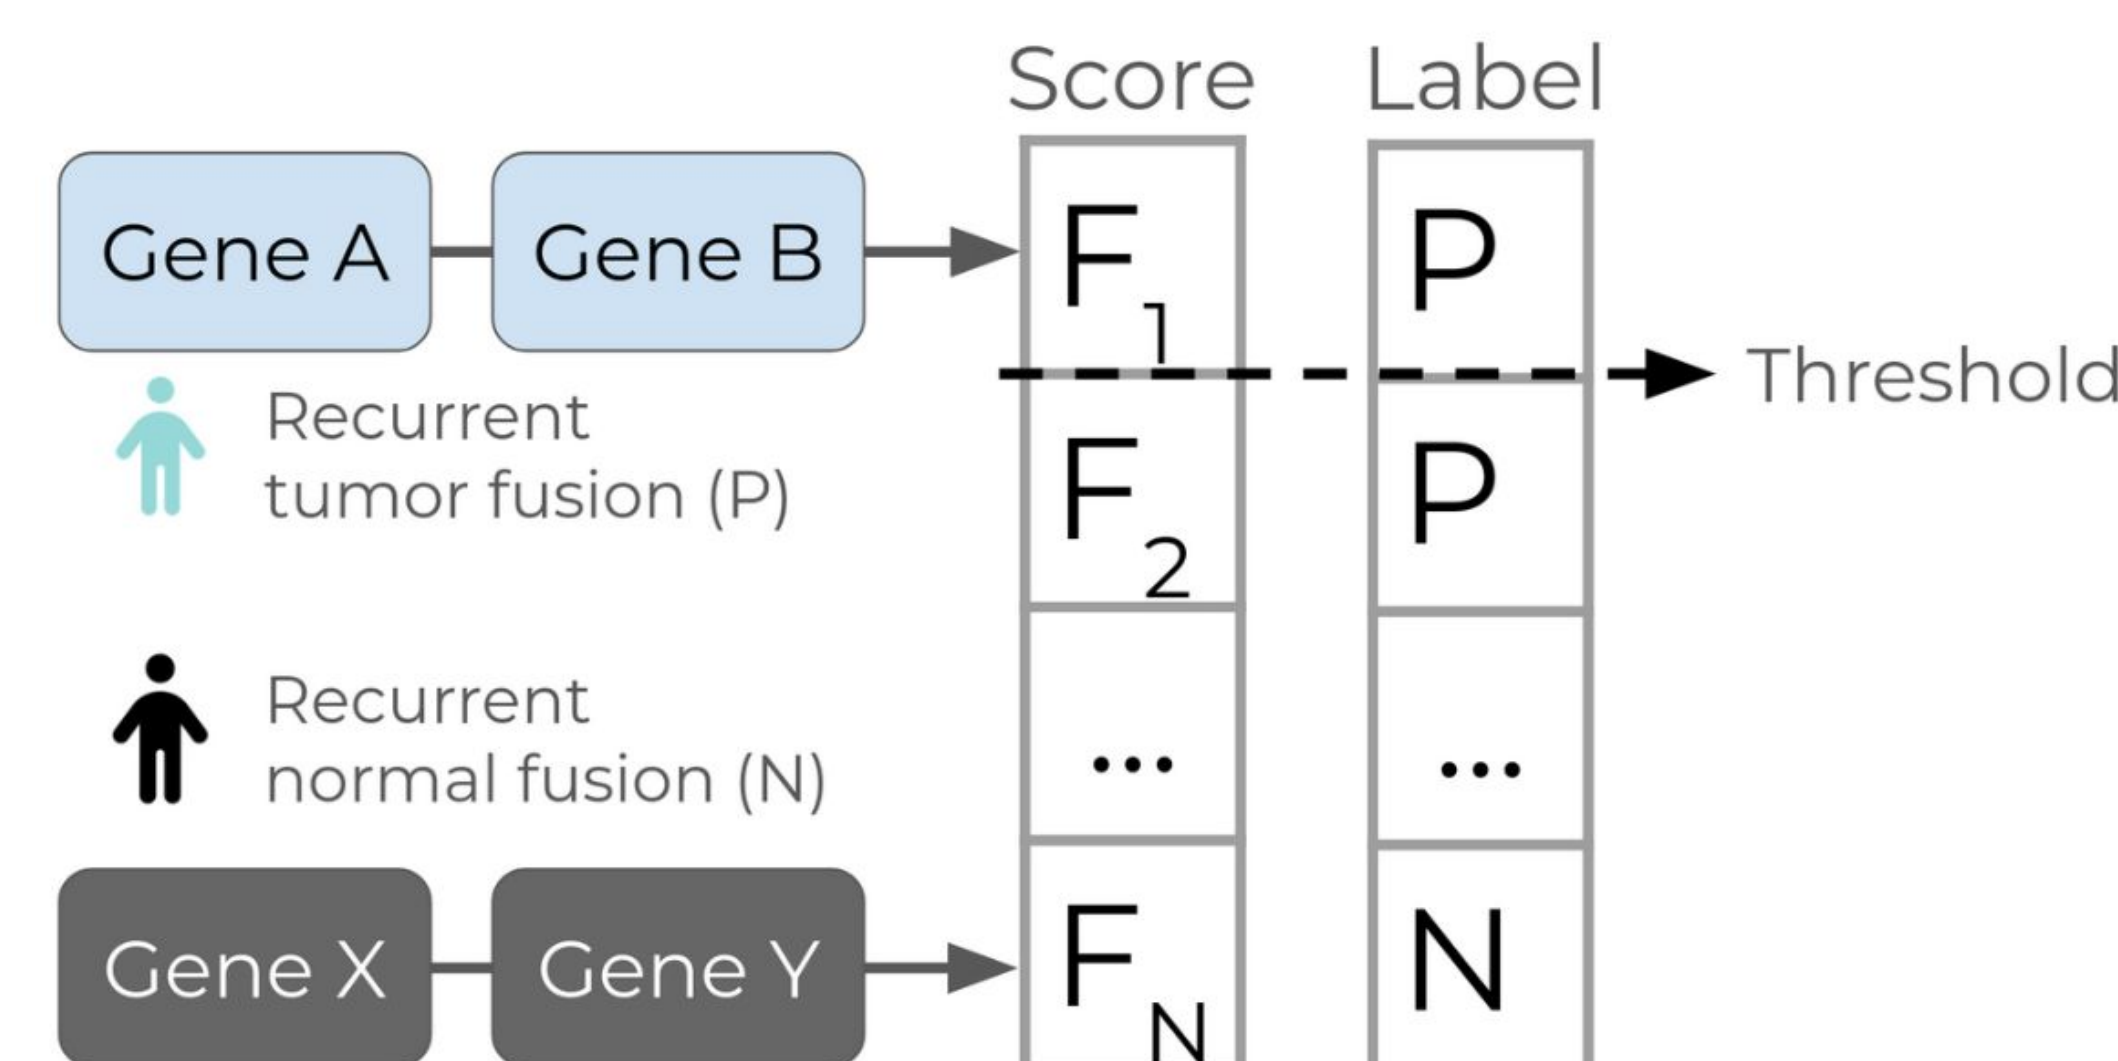

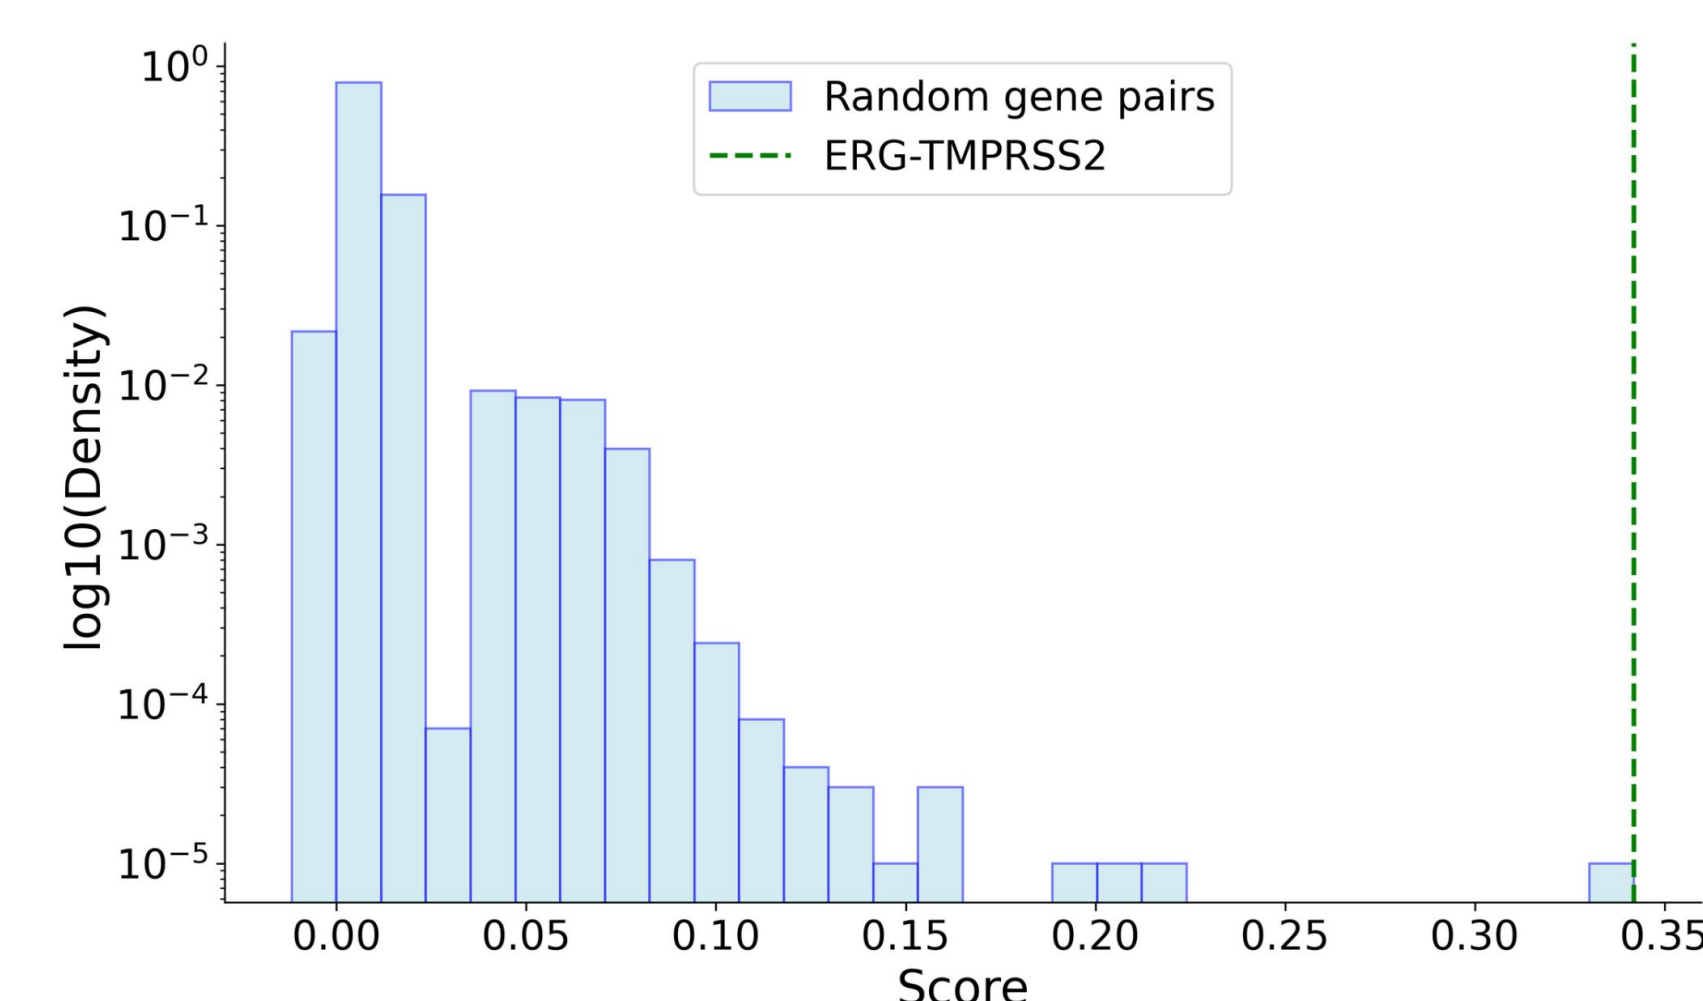

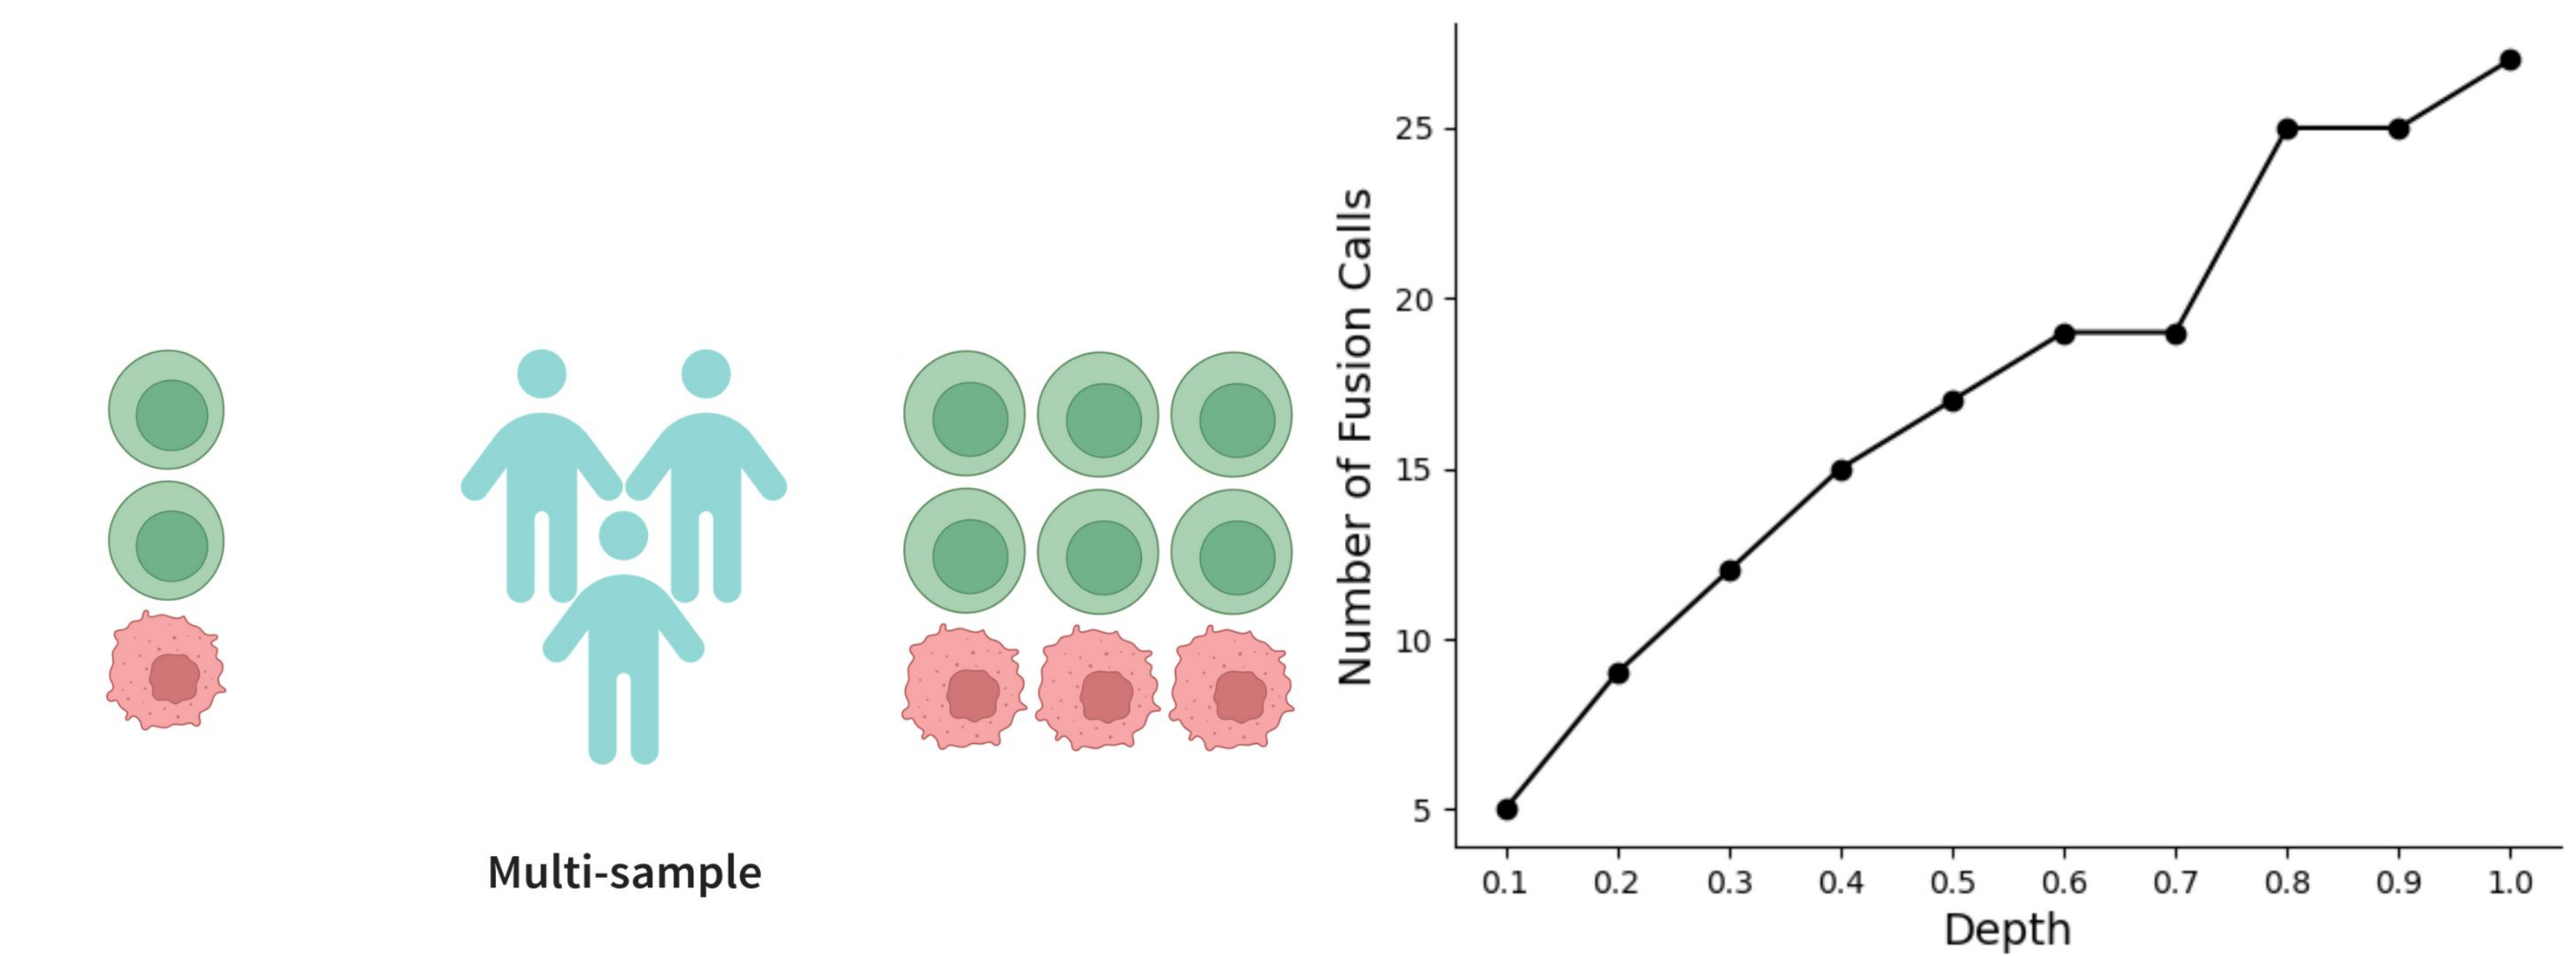

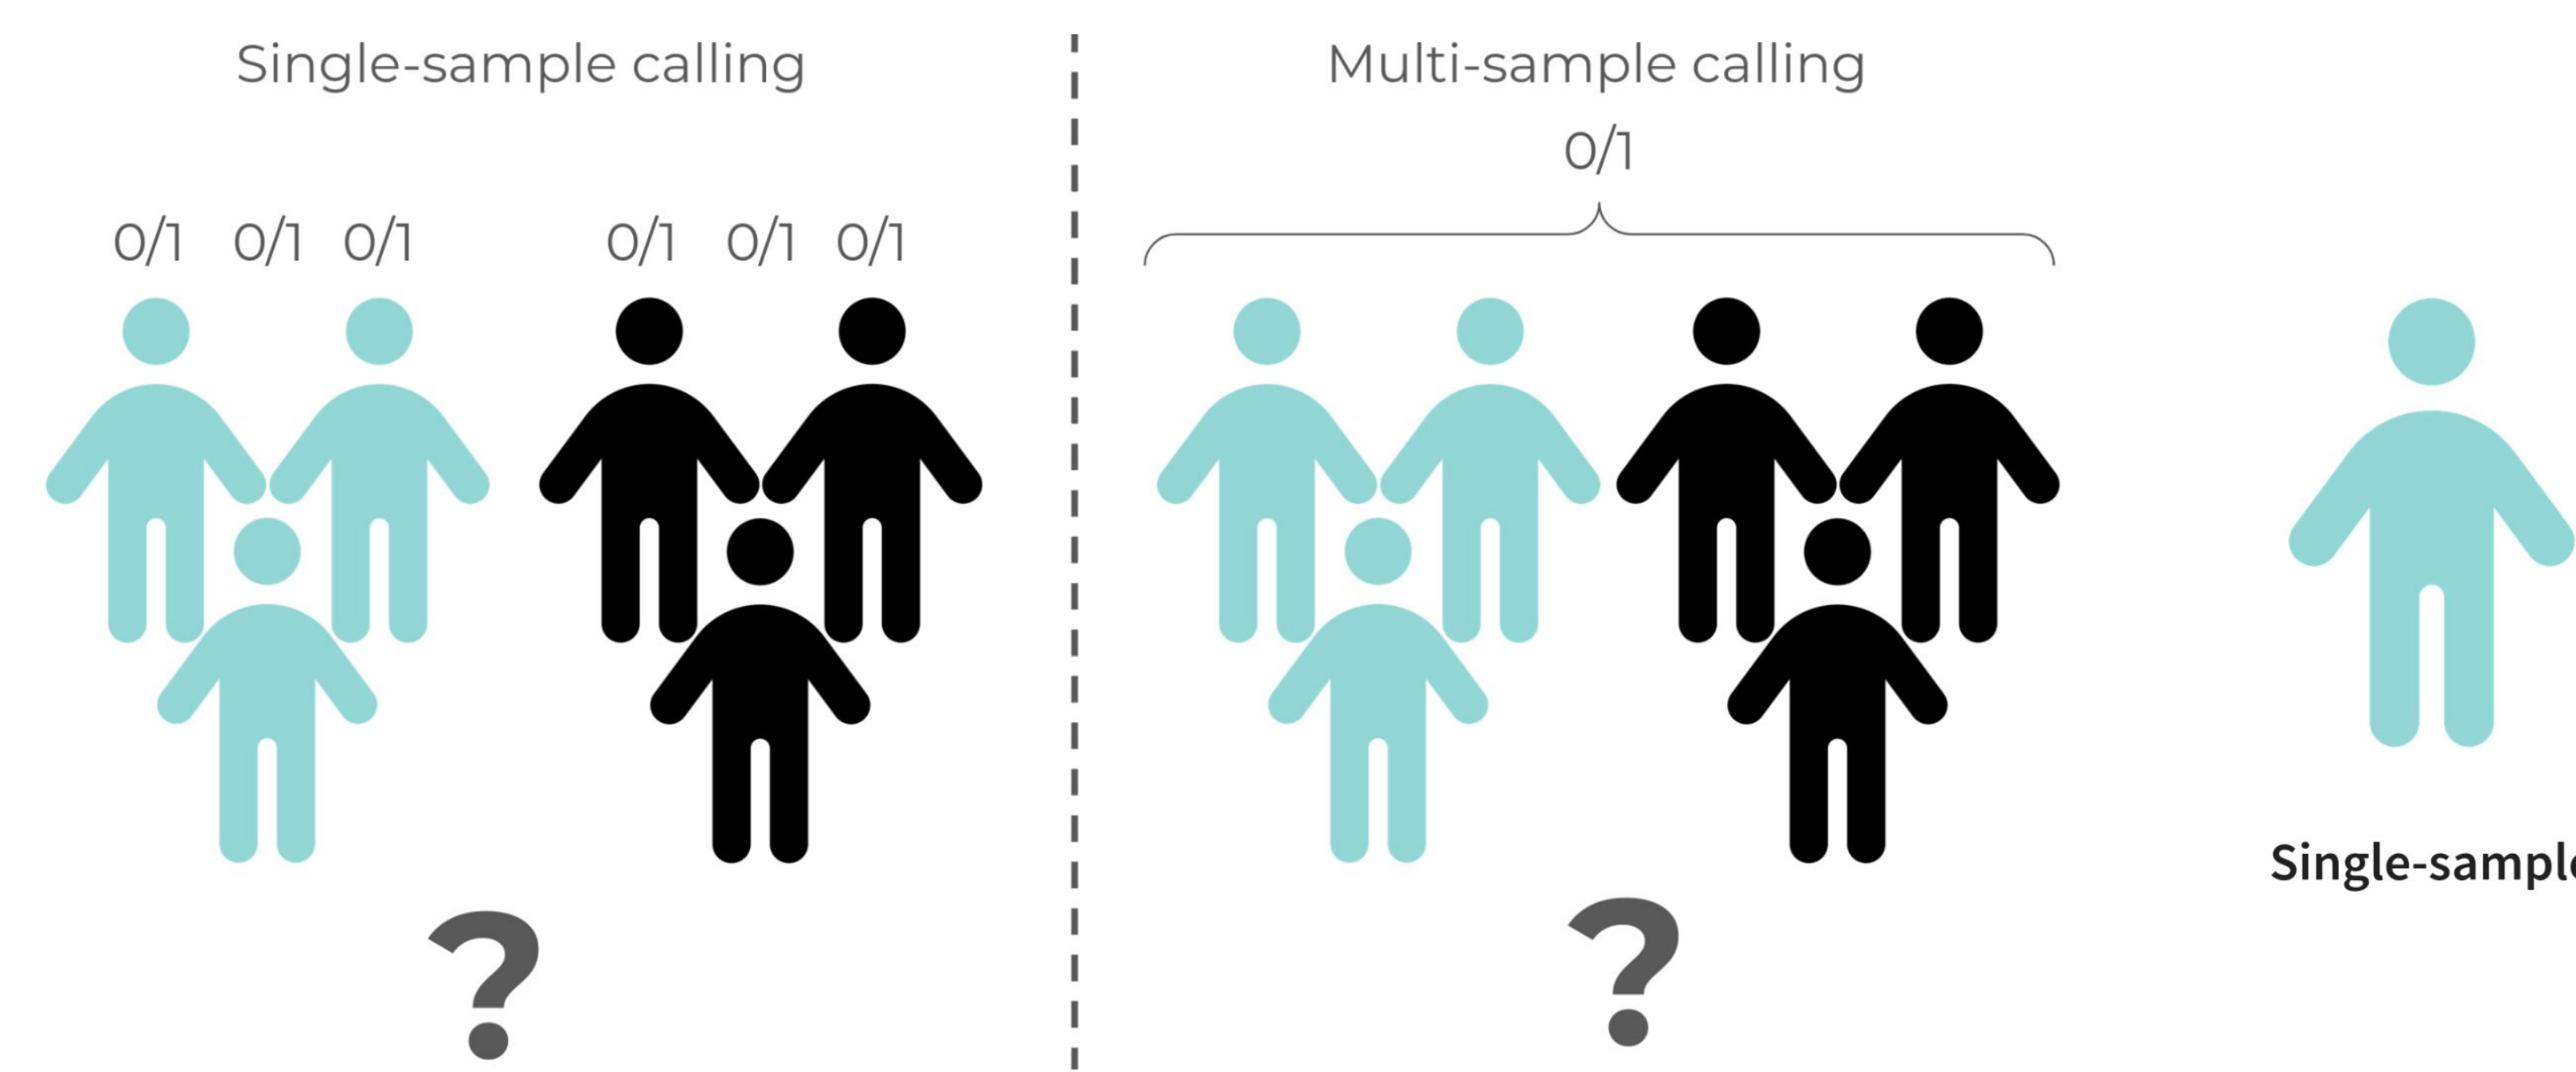

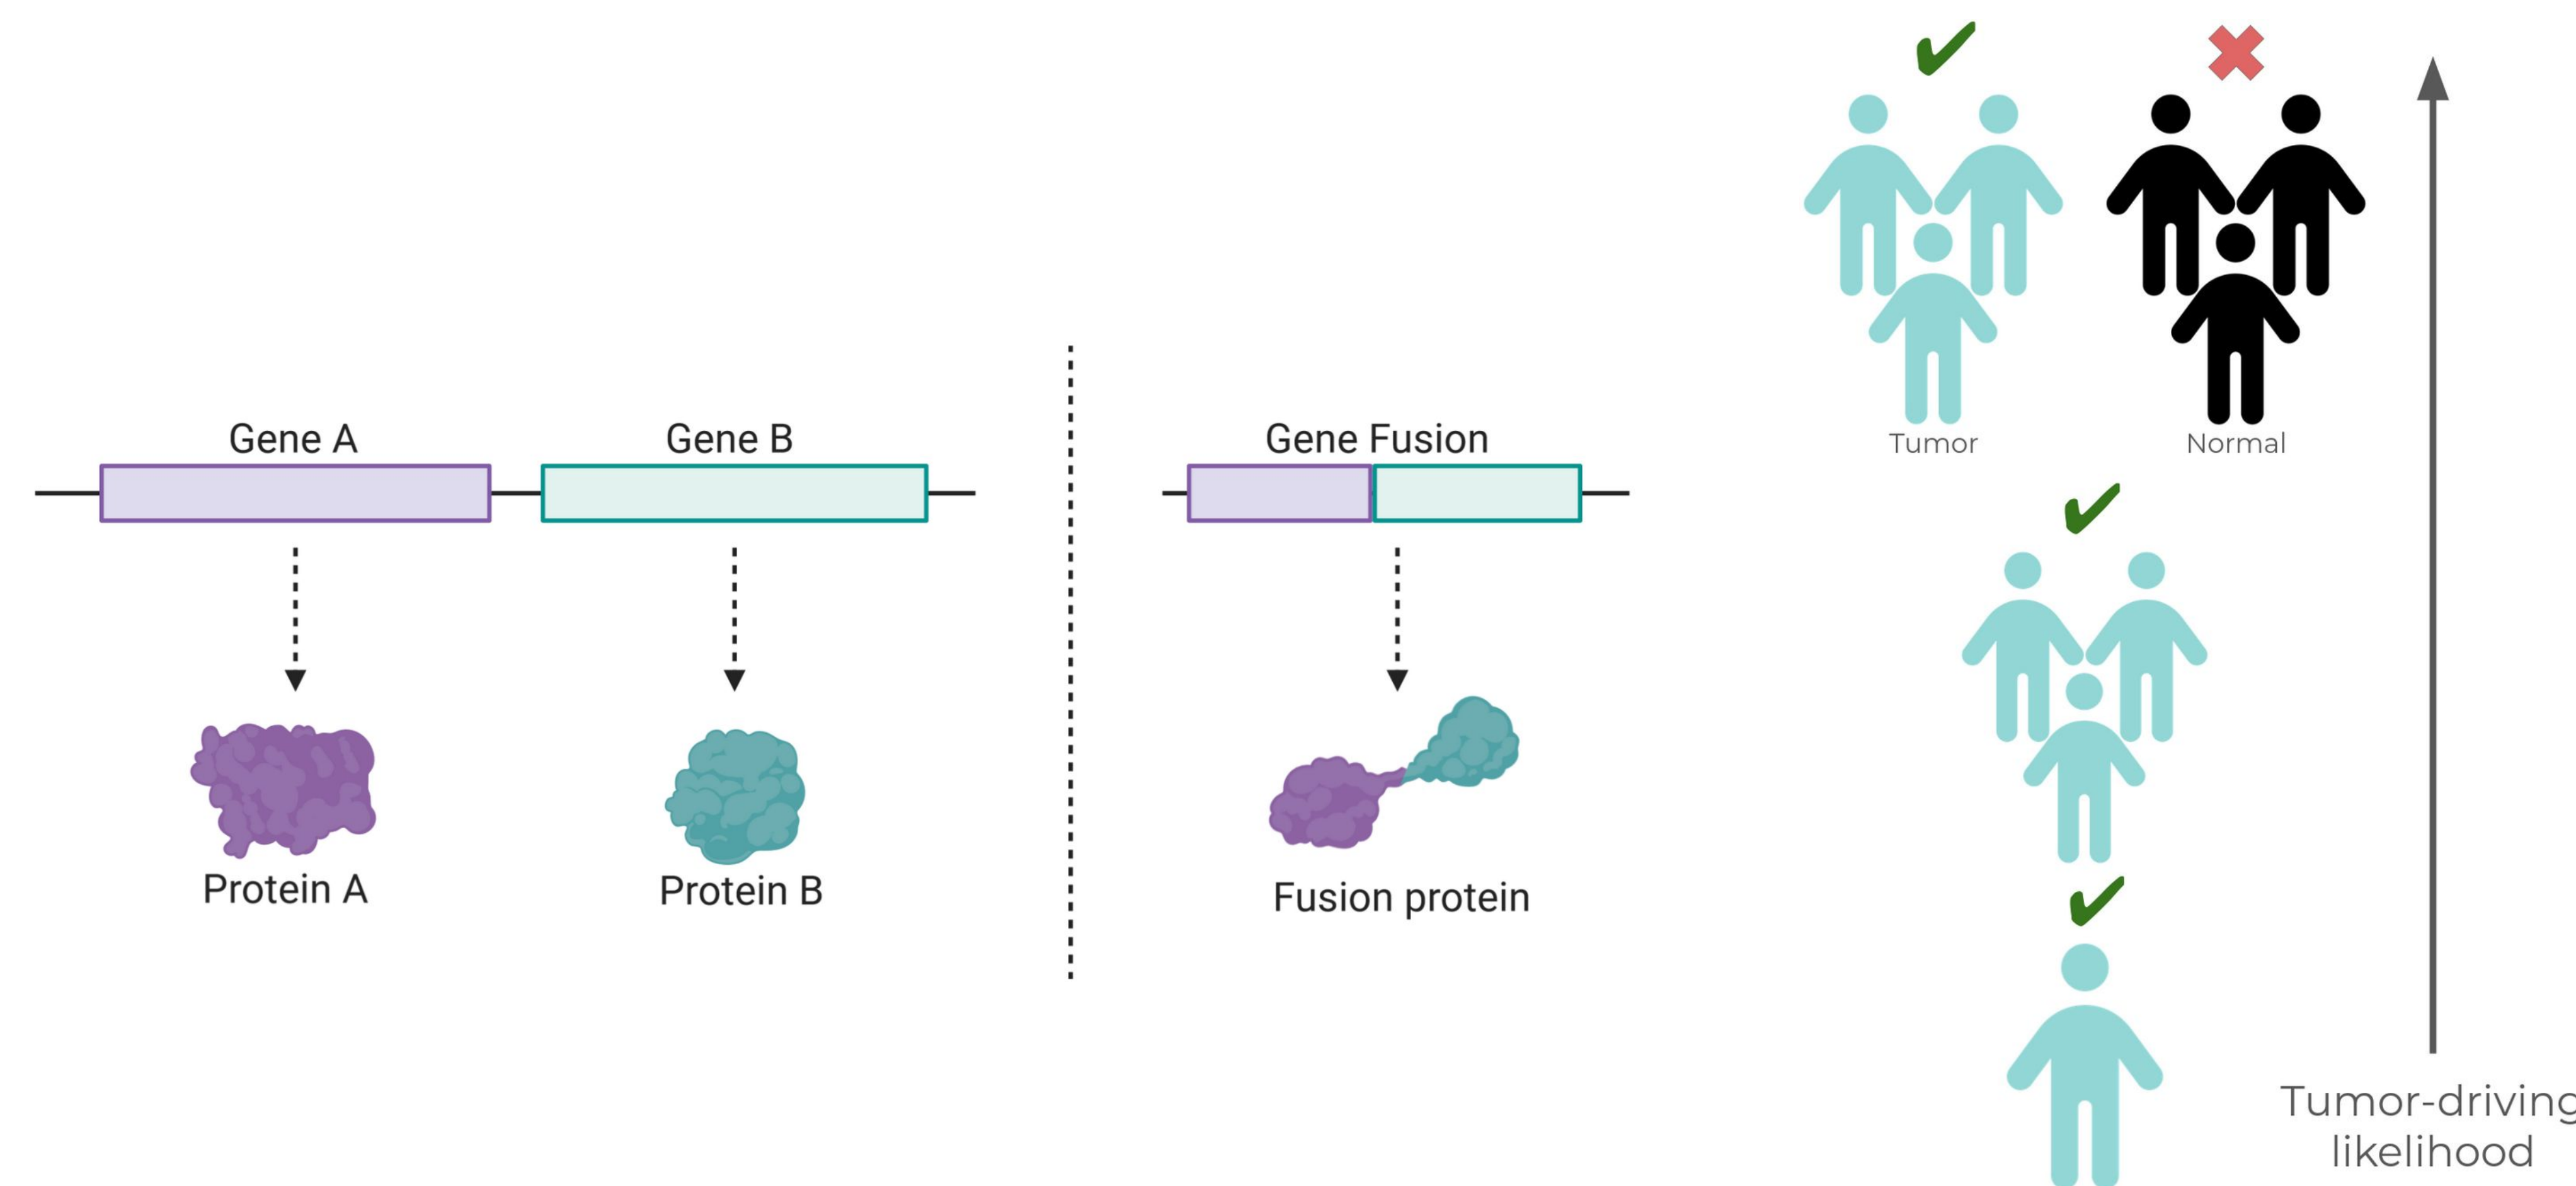

Parkinson's disease

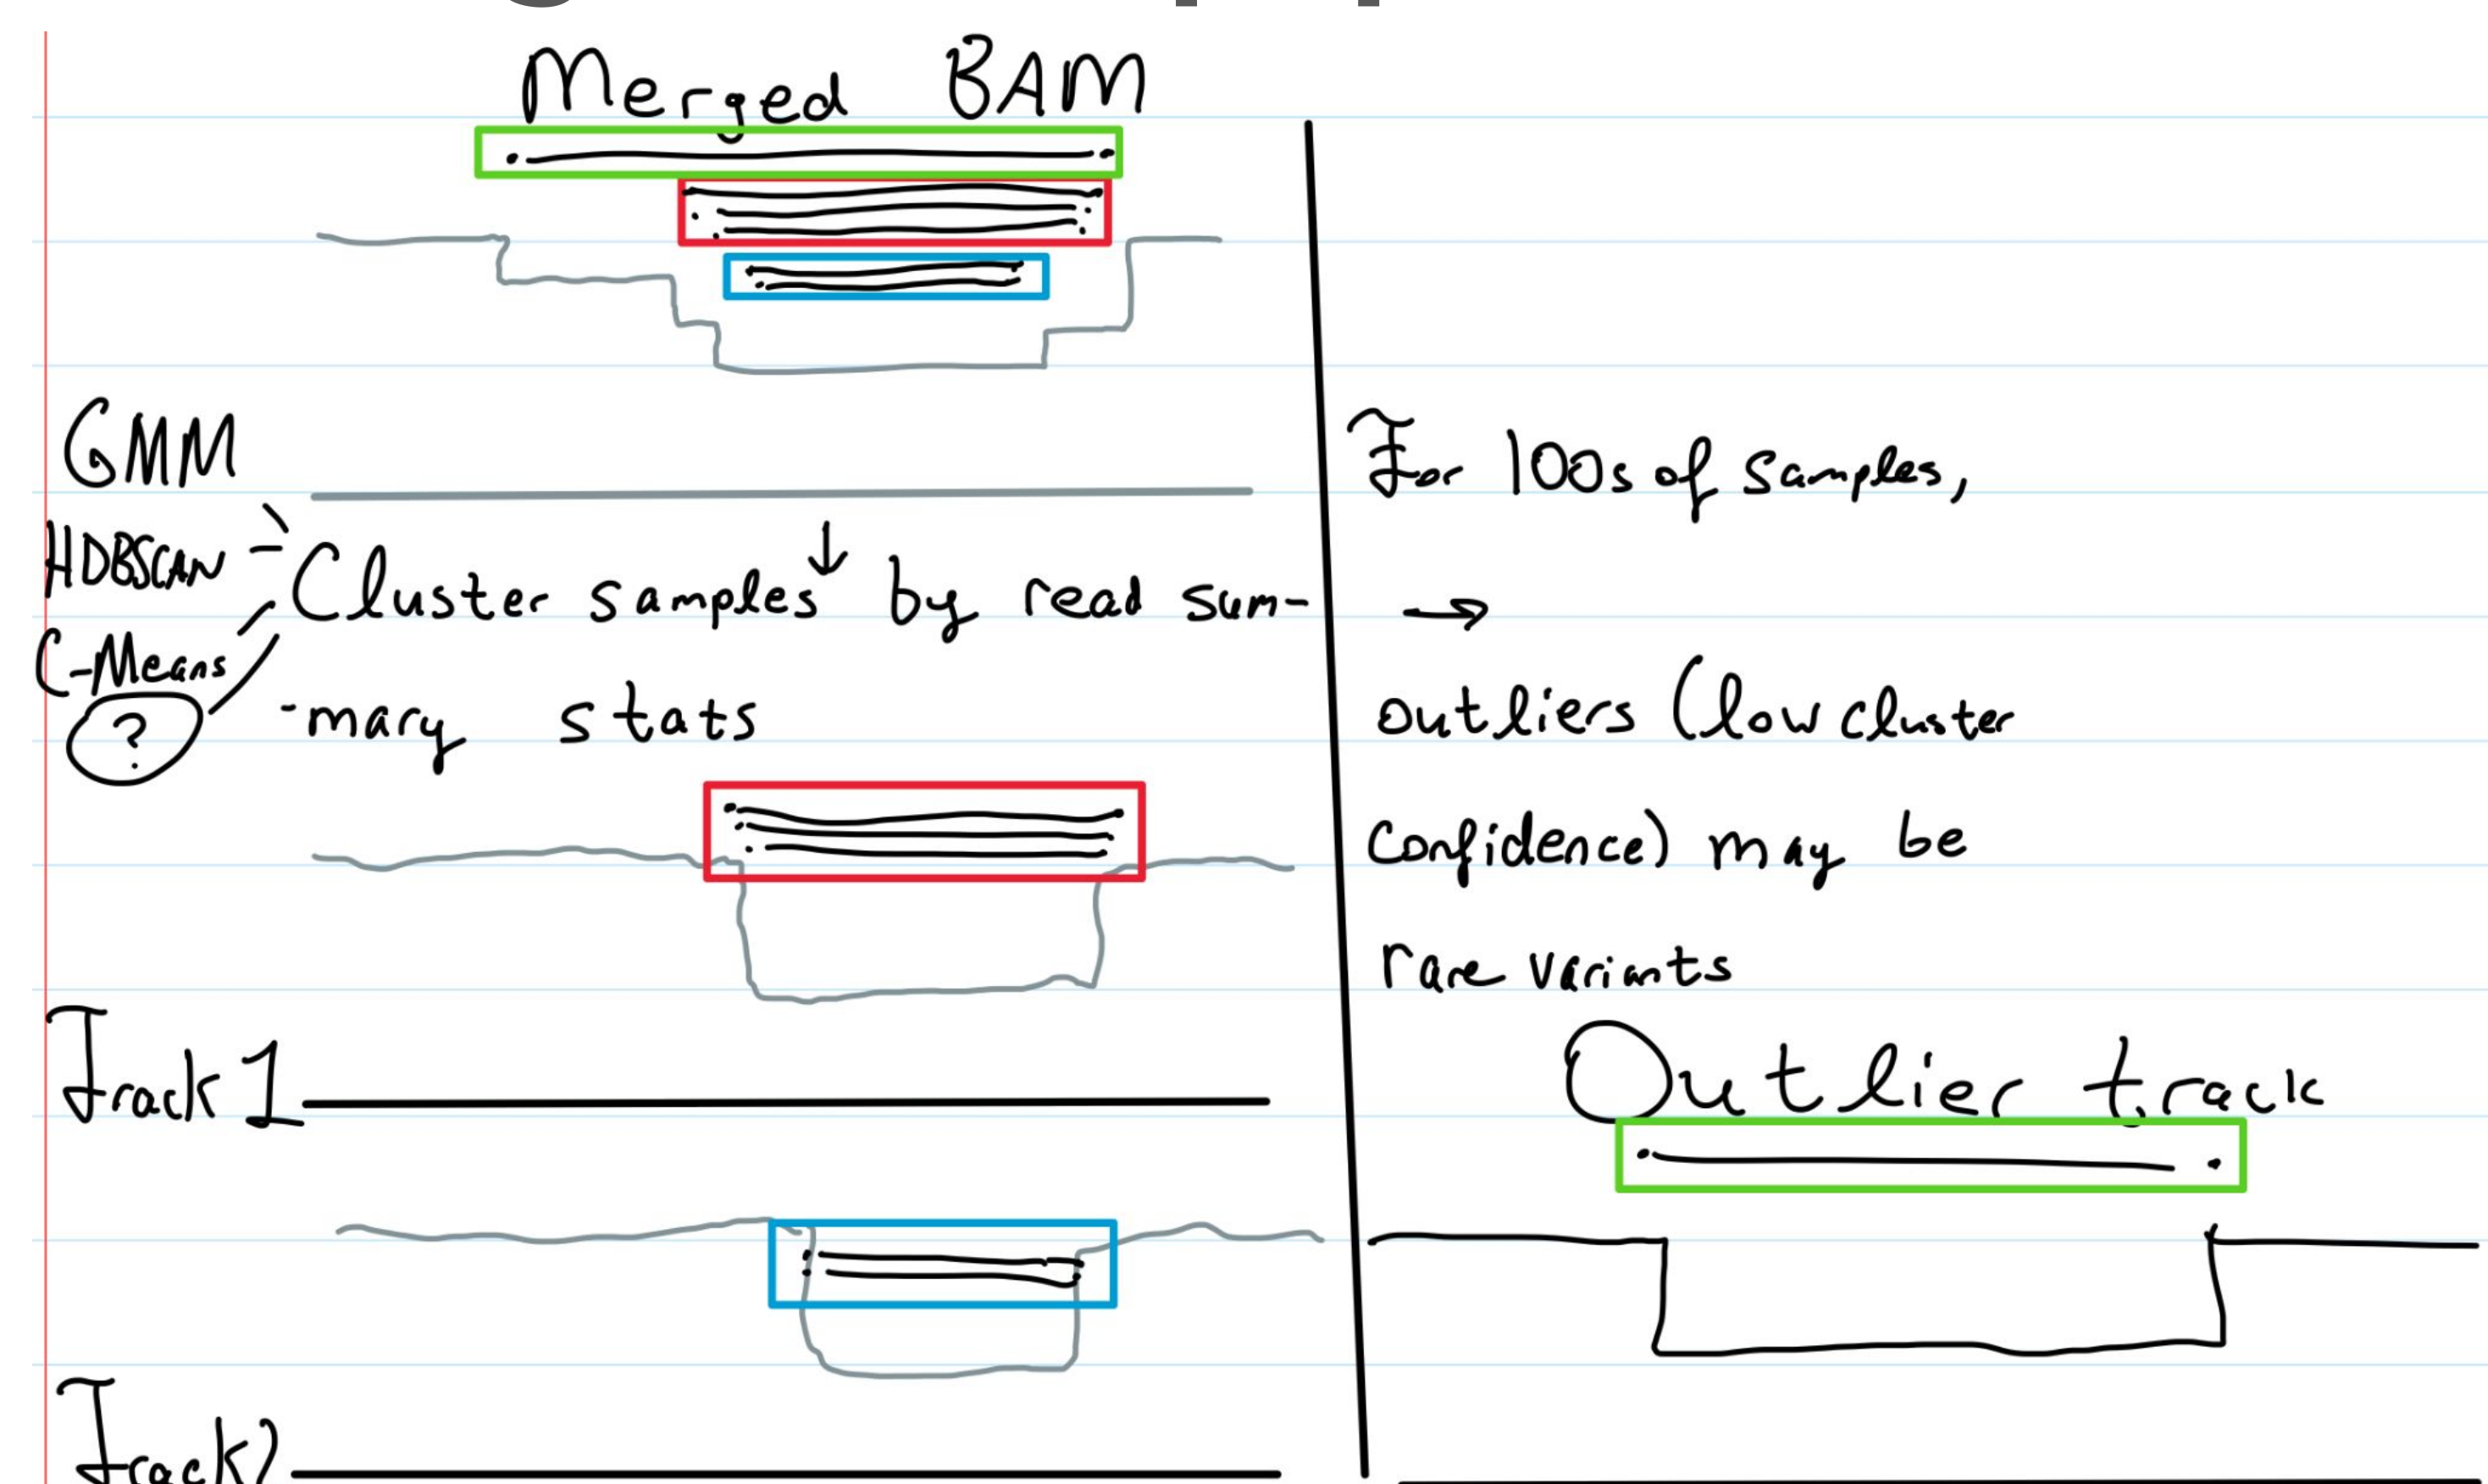

Study	Topic	Samples
1000 Genomes Project	SV ancestry	2,504
gnomAD	Mutational constraint	141,456
PCAWG	Tumor gene fusions	2,658

Tumor gene fusions

K562 chronic myeloid leukemia STAR-Fusion calls

Visualizing variant population structure

Mosaic Variants
